TEXAS VIEW OF COLQUITT.

Senator Sheppard performed a duty most admirably when, as a spokesman for Texas, he rose in the Senate Monday and assured the country that the senti ments of the people of this State are al together misrepresented by the fantast gyrations of their governor. Not only were Senator Sheppard's words well chosen, but they were uttered at a pecultarly opportune moment. The countr was in danger of inferring, from the studied heroics of Gov. Colquitt, that the none of President Wilson's supplemen-tary legislative program as yet placed people of this State disapprove of the President's course, and that they are clamoring for intervention. That misar prehension is capable of producing mis-chief, and hence Senator Sheppard ren-dered a service to the nation when he spoke words which must assure the country that about 99 per cent of the fingoist to be found in Texas is located in the selfagitated breast of its governor. Gov. Colquitt pretends to be greatly concerned to preserve "the honor of this State and fairs of Texas might not unnaturally suppose that he has been animated, in the many untimely things he has done, by that exalted motive. us in Texas less credulous. But more important still is the varia ever, is a question which can only be an apple. At sixty-seven years a man determined by an earnest investigation, should know his own equation. Then there is the variation of taste constant passage of Washingtonians in asphyxiation and the community will One "likes" strawberries, another does spiring. It had in it the thought that these two lads being brought from ous center, this taste or liking and methods of Congressmen who sojourn would mean a penitentiary sentence for without doubt it is the "tasting good" that is the first essential of proper food. This is true, even though there are many counterfeits, things that taste good and yet are not good.

The point here made, however, is that variation of taste or relish bears a relation to variation of nutrition. It is this s satisfaction or deficit of nutrition that should be closely observed, definitely ascertained, and then made into a rule. This is what our centleman has done, he

There is a variation in satiety. This ingularly valuable check on overindulgence is not equally active in all persons. Many have so long disregarded the sensation that they are left unwarned as to when they have caten enough. On the other hand the satiety nerve, if we may so call it, may have been flattered by too much authority. Fear of overcating often becomes an unreasonable deterrent. Rather than suffer again, as in one bad hour, a person will become overabstemious.

The amount of sleep habitually taken has much to do with the amount of food neede i. Mr. Edison is reported to go often twenty hours without sleep. How can such a practice afford reliable general wisdom as to the amount of food?

Here again is one of those unaccountable personal idiosyncracies that sets off the man in a class by himself. Indeed, at almost every angle the inventor stands alone. Certainly his intellectual adaptation is strikingly exceptional.

In fact, the eleven ounce measure not a "general diatetic" guide.

The most generous of men cannot share the pleasurable sensation that he feels is wholly inside himself. There is a limit to what one may give away. One breathes for himself. He may stop breathing for the sake of another, giving away his life. But the joy of the breath or life, as long as we live, is sacredly our own

We are pressed upon, on every side, by men and things. But there is a citadel of the person. Men and things cannot invade us there. We can never surrender the citadel. We cannot do ight nor wrong for another. We cannot answer the Judge for another. "We brought nothing into this world" but ourselves. "We can carry nothing out" but ourselves.

President Arthur's Friendship for the Late Senator Teller.

(Written expressly for The Herald.) By DR. E. J. EDWARDS.

When Gen. Chester A. Arthur first ook his seat in the Senate chamber on the day after his inauguration as Vice president, he was especially attracted for some reason never understood by him to tive quantity. thur had met the Senator in a perfectly perfunctory way only, but there was omething about the personality of this intensely serious and wonderfully industrious Senator which caused Gen. Arthur frequently to take heed of him.

The two were utterly unlike, both in

their intellectual characteristics and in their temperamental qualities. Gen. Ar-thur was a man of highly cultivated never overdressed, but always perfectly dressed. Senator Teller, on the other hand, seemed to require only immaculate cleanliness in his linen and apparel, not caring particularly otherwise about his garments or their fit. Gen. Arthur posessed a very keen sense of humor and moreover, a man of highly culti-literary tastes, although that was tnown only to a few of his friends. If Senator Teller had any sense of humor he never revealed that quality to any of long-did he suggest that he had been fond of reading the great authors.

He had no gift of oratory. His voice contained a peculiar, almost melancholy, cadence, and yet the intense earnestness and seriousness of the man and the sense of the sincerity and integrity of his character were so strong that he gained the respect of his colleagues and like admiration from Arthur, who cultivated the nator's acquaintance. When that rarely eccentric, rough, origi

Teller, of Colo In a conversation which I had with

President Arthur shortly after he had persuaded, with great difficulty. Sena to accept the portfolio of Sec retary of the Interior, the President said "There was no politics in the sense in which the term is commonly used in my selection of Senator Teller as Secretary which the term is considered as Secretary selection of Senator Teller as Secretary of the Interior. It was my personal choice. In the first place, I knew that he would be confirmed by the Senate instantity and without reference to a commit ty and without reference to a commit tee. In the second place, I knew the sincerity of the man and his wonderful power of application and industry. The had good reasons for knowing that he peculiarly strong common sense, and then, too, he was familiar with many features of that part of the country which is west of the Missouri and with which the Secretary of the Interior would have much to do. He did not want to give up his seat in the Senate. proud of the fact that he was the tennial Senator, having been elected as the first Senator from Colorado on the admission of that State to the Union in the centennial year. It was with the greatest difficulty that he was persuaded to give up a seat in the Senate to take a place in my cabinet. He was a very valuable man in the Senate, and I am certain that if he cares to return to that tertian that if he cares to return to that hody he will easily be reelected after his service in my cabinet is ended."

That prediction was justified, for Sena-tor Teller went from his office in the In-terior Department to the Senate cham-

Herald Reader Says Page's Speech Does Not Affect Canal Question.

To the Editor: Having in mind your very convincing editorial of March 2, entitled, "President Right on Canal Tolls." I beg space to protest against a recent trend of the discussion to include the speech of Ambassador Walter H. Page at the London banquet. Let it be admitted that Mr. Page made

a tactical blunder in that spec he attempted a pleasantry on a festive occasion. If it was a blunder, it need not necessarily be a far-reaching one. His remarks committed no one and misled no one. They embarrass only Mr. Page himself and, for the time, the President and ountry as a whole. If Mr. Page's pleasantry should lead to

any material injury to our nation responsible for the injury will be they who may so conjure the unlucky remarks as to warp and prejudice the public mind and thus obstruct the administration's

policy on the tolls question.

Is it not an admission of dire straits for the free tolls interests to grasp at such a straw as this unimportant and irrelevant incident?

The post-prandial speech of an Amhassader in this day and time should not be taken very seriously. Samuel Blythe recently stated this fact aptly and wit-The Ambassador of today has been horn of much, of his former im All important international policies are formulated by the home cabinet and communicated formally to the proper flicials of the foreign governments
